

WHAT IS CLAIMED IS:

1. A pre-moistened cleaning wipe for cleaning a hard surface comprising:

at least one layer of fibrous substrate material impregnated with a cleaning composition, said composition comprising:

from about 0.005% by weight and about 0.5% by weight of said composition of a detergent surfactant; and
from about 0.25% by weight and about 10% by weight of said composition of one, or more, organic cleaning solvents;

the balance being an aqueous solvent system, comprising water, wherein said composition has a pH under usage conditions of from about 2 to about 12.

2. The pre-moistened wipe of claim 1 wherein said detergent surfactant is at a level from about 0.02% to about 0.3% by weight of the cleaning composition.
3. The pre-moistened wipe of claim 1 wherein said organic cleaning solvent is at a level from about 0.5% to about 5% by weight of the cleaning composition.
4. The pre-moistened cleaning wipe of claim 1 wherein said detergent surfactant includes an alkylpolyglucoside.
5. The pre-moistened cleaning wipe of claim 1 wherein said cleaning composition does not include a hydrophilic polymer.
6. The pre-moistened cleaning wipe of claim 1 wherein said cleaning composition further comprise an antimicrobial active.
7. The premoistened wipe of claim 6 wherein said antimicrobial active is selected from the group consisting of quaternary ammonium salts, chlorhexidine diacetate, polyhexamethylene biguanide and mixtures thereof.

8. The premoistened wipe of claim 7 wherein said quaternary ammonium salts are selected from the group consisting of dioctyl dimethyl ammonium chloride, didecyl dimethyl ammonium chloride, C₁₂, C₁₄ and C₁₆ dimethyl benzyl, and mixtures thereof.
9. The premoistened wipe of claim 8 wherein the antimicrobial actives provide residual disinfectancy.
10. The pre-moistened cleaning wipe of claim 6 wherein said antimicrobial active is at a level of between about 0.001% by weight to about 0.1% by weight of said composition.
11. The pre-moistened cleaning wipe of claim 1 wherein said at least one substrate layer is made of a fibrous material having a basis weight of between about 30 g/m² and about 100 g/m².
12. The pre-moistened cleaning wipe of claim 11 wherein said at least one layer is made of a fibrous material comprising between about 20% by weight and about 80% by weight of wood pulp fibers.
13. The pre-moistened cleaning wipe of claim 1 wherein said at least one layer is made of a fibrous material having a basis weight of between about 100 g/m² and about 500 g/m².
14. The pre-moistened cleaning wipe of claim 13 wherein said pre-moistened cleaning wipe has a wetness of between about 1 and about 5 grams of cleaning solution per gram of substrate.
15. The pre-moistened cleaning wipe of claim 1 wherein pre-moistened cleaning wipe has a fluid capacity of between about 2 and about 10 grams of liquid per gram of dry substrate.
